

## **IN THE SPECIFICATION**

Amend the paragraph on page 6 of the specification as follows:

Referring now to figure 1, there is shown a CDMA communication system, indicated generally by 10. The communication system 10 comprises a transmitter 12 and one or more ~~a~~ receivers 14, 15. Of course, for a two way communication system, each communication unit will have transmit and receive capabilities. In a CDMA mobile telephone system a base station will be capable of transmitting data to and receiving data from a plurality of remote units (such as ~~receivers 14, 15)~~ whilst each remote unit will receive messages from and transmit to, in general, only a single base station at any one time.
